The Intec in Leipzig!
The venue for the metal working industry in Germany in 2021.

MARCH 2 – 5, 2021
INTERNATIONAL TRADE FAIR FOR MACHINE TOOLS, MANUFACTURING AND AUTOMATION
Dear Sir or Madam:

The spring of 2021 will be exciting for the world of machining. As that is when professionals gather at the Intec – one of the leading trade fairs for metal working in Europe. The range of offerings in the exhibition halls with approx. 1,000 exhibitors planned encompasses machinery, technological solutions and services of all phases of industrial production.

Visitors of the Intec represent all branches of the metal working and processing industry. The most important customer segments include machine and plant construction, vehicle construction, precision engineering as well as tool and mold design.

The Z - Subcontracting Fair takes place right next door as an important industrial partner with buyers and suppliers. In conjunction with the Z, the Intec focuses on the integrated value added for the production of tomorrow.

In 2021, the Intec is the most important industrial platform taking place for the metal working industry in Germany. Make sure that you will be on hand there. We look forward to your participation.

Best regards from Intec's project team

Dr. Deliane Träber, Kersten Bunke, Annegret Jerke and Ines Wollenberg
INTEC’S PROFILE
• Machine tools – machining, eroding, cutting
• Laser and welding technology
• Precision tools, apparatuses
• Automated production and robotics
• Drive technology, process control
• I&C equipment and quality assurance
• Software, IT applications
• Sheet metal working and forming technology
• Additive manufacturing technologies
• Mold and die manufacture
• Assembly and materials handling technology
• Industrial electronics, sensors
• Intralogistics
• Research

VISIONS MARKETS TRENDS

THE SPECIALIZED PROGRAM – TO THE POINT
Recognize trends and turn those into decisions. Network and establish strategic partnerships. Integrate innovations into production.

Industrial production is facing considerable challenges.

Conferences, symposiums, workshops – for transfer of knowledge and innovations

CONTACT - Business Meetings – International networking
Exhibitor Forum – where your projects are at the center of attention

SPECIAL EXHIBITS AS HOTSPOT FOR NEW TECHNOLOGIES
• Additive + Hybrid – Production and its transformation
• Sensors – On the way to intelligent production and smart products

IDEAS ARE SPURRED BY CHALLENGES

INNOVATION COMPETITION IN 2021
Intec Award for innovations/innovative developments of products, services or technological solutions

Intec Award for Young Talent for best practice strategies for recruiting and furthering young talent
STRONG PARTNERSHIPS

The industry is changing. It faces the challenge of having to merge today's manufacturing practices with a new technological dimension in production. Manufacturers, service partners, vendors and suppliers of components and modules are partners on an equal footing in this chain.

With approx. 350 exhibitors, the Z - Subcontracting's main focus is consistently placed on suppliers and service providers for industrial production. High level of international participants – every fourth exhibitor – ensures at the same time access to interesting supply and sales markets.

The fact that both trade fairs focus in particular on similar sectors creates synergy effects that benefit both exhibitors and visitors alike.

In 2019, the Intec and the Z drew 24,400 visitors from 41 countries to Leipzig's exhibition center.

ONE TICKET = TWO TRADE FAIRS

INTERNATIONAL SUBCONTRACTING FAIR FOR PARTS, COMPONENTS, MODULES AND TECHNOLOGIES
