

Until **October 2nd 2022** you can apply as an [External Expert](#) within the European project [EU DigiTOUR](#) in which ITKAM is a partner.

What is this about?

The COSME EU DigiTour project encourages the digitization of tourism companies through technologies such as AR/VR, Big Data, IoT and Artificial Intelligence.

In autumn 2022, the second phase of the project begins: the [High-Growth Programme](#). It's an educational program for startups. The registered participants will improve their skills in the 4 digital key technologies, collaborating with External Experts for a period of 3 to 6 months.

What is the role of the External Experts and who are we looking for?

External Experts are experienced specialists with knowledge in at least one of the project's key technologies, and who possibly have already some experiences in mentoring for startups. They will initially select applicants to the High Growth Program, and then provide **mentoring** and professional **support** to companies, meeting them regularly online.

One of the benefits of being an External Expert is knowing the state of the art of the digitalization of companies in Europe as well as getting in touch with professionals in this field. Furthermore, thanks to their visibility, External Experts will have the chance to spread their name on European level thanks to the project's visibility as well as of meeting new potential clients and collaborators.

[Applications](#) for External Experts willing to participate in the project are open from September 1st to October 2nd 2022.

As the project works with companies located all over Europe, English language skills are required.
